

Standard Print-On-Demand NOAA nautical chart
(36" or 42" wide; typically 36" to 60"
tall, depending on the geographic area)

OceanGrafix provides commercial and recreational mariners with the most up-to-date, NOAA-approved nautical charts ever offered. Charts are printed only after an order has been received, ensuring the most up-to-date information at the time of printing. Charts are typically shipped the same business day.

More reasons to order your OceanGrafix Charts TODAY!

- **Up to date** - OceanGrafix uses digital technology to incorporate the most current Notice to Mariners Corrections, National Geospatial-Intelligence Agency (NGA) (formerly NIMA) Notices and critical safety information provided by NOAA.
- **Durable Material** - OceanGrafix NOAA charts are printed on water-resistant paper. A laminated version that withstands wet, harsh conditions is also available – it has a tough coating that resists abrasions and makes the chart easy to write on.
- **Chart information** - Useful and navigational information such as tide tables and bridge clearances are included, and are chart-specific to the needs of commercial and recreational mariners.
 - **Commercial** - navigational chart information such as tide tables, bridge clearance and selected VHF radio channels have been added to the margins as convenient and useful references.
 - **Recreational** - added safety information, boating tips and emergency procedures have been added in the margins, providing helpful guidelines.

Look for the OceanGrafix logo – assurance that you've ordered the only NOAA-approved, full-size, print-on-demand nautical chart on the market today!
